Module Study Design and Research

20 / 21 May 2026 in Bern

Join Us in Advancing Gender-Responsive Healthcare!

Module Study Design and Research

- ➔ Become familiar with general principles and international policies on the inclusion of sex and gender in health research.
- ➔ Learn to critically appraise sex/gender bias in research design, methods, interpretation, and publications.
- ➔ Get familiar with different methods and approaches to minimize sex/gender bias.
- ➔ Gain thorough understanding of the importance of sex and gender in your own research projects.

The module is CME-accredited.
